**U.S. DISTRICT COURT
DISTRICT OF R.I.**

SUPPORTING DOCUMENTATION

The supporting document being furnished shows the latest prescriptions given to me were approximately 7 1/2 months ago just after September 21st, 2020. These prescriptions are for OxyContin ER 40mg tablets, as well as OXYCODONE 10mg instant release tablets. I was also given morphine, and dilaudid for pain post posterior spinal fusion. All drugs designed and sold by the companies above. Johnson and Johnson one of the main companies, as well as Purdue Pharma LP, etc. All highly addictive with long physical withdrawal cycles. There is a 10 year limit on personal injury, and this puts me well within the timeframe for proper recompense for the personal injury done. On and off throughout my life I have had to deal with inferior drugs to help me with severe pain due to my severe kyphosis-scoliosis. These drugs stated above are inferior, in that most people require more and more of them to sufficiently kill pain reducing the quality of life over time, and creating physical addiction. Furthermore, these drugs could have been designed with what's called a feedback loop to the nociceptin receptor. The nociceptin receptor is a peripheral receptor to the mu-opioid receptor, preventing abuse and addiction. However, status quo, and strong sales through Johnson and Johnson's steady supply of heroin poppies to half the countries other opioid companies stopped any changes in their tracks. 36x the growth over a 15-20 year period in Johnson and Johnsons opioid sector through this distribution cycle. The proof is also with the pre clinical drug AT-121, approved recently for further trials as a drug designed by a few scientists with a grant. This drug is an analgesic, one of the first with a nociceptin feedback loop. Showing the ability of a few scientists with little funding compared to the main opioid companies. If these few scientists accomplished this, the opioid companies sure could have, especially with the amount of cash on hand

business to business. Nevertheless, the personal injury damage has been done, and I expect my day in court. My family is behind me 100%, and I will see this through to its eventual conclusion. My life is not going to be sabotaged by a few companies striving for more earnings per share of common stock. I take no Opioids or Buprenorphine, and will suffer with the extra pain. It's a much better alternative to taking Opioids or Buprenorphine.
